

- LEGENDA:
- projektowana instalacja gazowa
  - projektowana instalacja grzewcza - zasilanie
  - projektowana instalacja grzewcza - powrót
  - projektowana przebudowa instalacji C.O. - zasilanie
  - projektowana przebudowa instalacji C.O. - powrót
  - projektowany przesywny punkt podparcia rurociągu

Zestawienie i specyfikacja urządzeń i armatury wg. "Zestawienie wyposażenia kotłowni"

Lp Opis urządzenia  
Kk Kotłownia kotłeniorowa wyposażona w dwa kotły AIC NC100WH  
Kg Kocioł gazowy NESTA CHROME 100WH o mocy do 100kW  
Wk Wymiennik ciepła obiegu kotłowego  
Nwk Naczynie wzbiorcze obiegu kotłowego z zaworem kółpakowym  
NwCO Naczynie wzbiorcze instalacji CO z zaworem kółpakowym  
Po Pompa obiegowa instalacji CO  
Cp Ciepłomierz ultradźwiękowy  
Sp Separator powietrza  
Fo Filtrrodmulnik  
Km Kompensator mieszkowy kolierzowy  
SUW Stacja uzdatniania wody  
Rg Reduktor gazu  
Om Gazomierz  
Zkg Zawór kulowy gazu  
Gpe Połączenie elastyczne  
G1 Detektor metanu  
G2 Moduł sterujący  
G3 Sygnalizator optyczno akustyczny  
G4 Zawór kłapowy samozamykający

|                                                                      |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |                             |

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |
